

Relevant Nebraska Factsⁱ

State Medicare Information

- There are 287,565 total Medicare beneficiaries in the State of Nebraska, which represents 16 percent of the total population.
- Nebraska Total Annual Medicare Spending equals \$2,519,000,000.

Documented Shortage of Primary Care Health Professionals

- According to the Health Resources and Services Administration , Nebraska has 109 total primary care Health Professional Shortage Areas (HPSA).
- Nebraska’s population living in a primary care HPSA equals 84,486, which represents 4.6 percent of the overall population of Nebraska.
- Nebraska’s estimated underserved population equals 51,258, which represents 2.8 percent of the overall population of Nebraska.
- There are 121 licensed audiologists in the State of Nebraska who could help.

Hearing Loss Statistics

- Of the more than 36 million Americans who experience hearing loss, 30 percent are 65-74 years old and 47 percent are 75 years old and older.
- Nebraska has 235,000 residents with hearing loss, which represents 13.2 percent of the state population.
- Untreated hearing loss results in a greater occurrence of other physical and mental conditions in elderly patients, substantially reducing the quality of life for older adults and increasing Medicare spending. Treated hearing loss enhances the quality of life and reduces health care costs.

National Data on Older Adult Falls

- Every 18 seconds, an older adult is treated in an emergency room for a fall.
- The average hospitalization for a fall costs \$17,500 and the direct medical cost for falls in 2010 was \$30 billion.
- Among older adults (those 65 or older), falls are the leading cause of injury death. They are also the most common cause of nonfatal injuries and hospital admissions for trauma.
- Elderly falls are preventable as are their associated financial and societal costs. Audiologists reliably diagnose and treat the vestibular disorders and help prevent older adult falls.
