

## Relevant New Hampshire Facts<sup>i</sup>

### State Medicare Information

- There are 266,210 total Medicare beneficiaries in the State of New Hampshire, which represents 20 percent of the total population.
- New Hampshire Total Annual Medicare Spending equals \$1,905,000,000

### Documented Shortage of Primary Care Health Professionals

- According to the Health Resources and Services Administration , New Hampshire has 27 total primary care Health Professional Shortage Areas (HPSA).
- More than 48,624 of New Hampshire residents (3.6 percent) live in a primary care HPSA. The national average is 12 percent.
- There are 70 licensed audiologists in the State of New Hampshire who could help.

### Hearing Loss Statistics

- Of the more than 36 million Americans who experience hearing loss, 30 percent are 65-74 years old and 47 percent are 75 years old and older.
- New Hampshire has 181,000 residents with hearing loss, which represents 13.7 percent of the state population.
- Untreated hearing loss results in a greater occurrence of other physical and mental conditions in elderly patients, substantially reducing the quality of life for older adults and increasing Medicare spending. Treated hearing loss enhances the quality of life and reduces health care costs.

### National Data on Older Adult Falls

- Every 18 seconds, an older adult is treated in an emergency room for a fall.
- The average hospitalization for a fall costs \$17,500 and the direct medical cost for falls in 2010 was \$30 billion.
- Among older adults (those 65 or older), falls are the leading cause of injury death. They are also the most common cause of nonfatal injuries and hospital admissions for trauma.
- Elderly falls are preventable as are their associated financial and societal costs. Audiologists reliably diagnose and treat the vestibular disorders and help prevent older adult falls.
