

## Relevant West Virginia Facts<sup>i</sup>

### State Medicare Information

- There are 443,870 total Medicare beneficiaries in the State of West Virginia, which represents 24.6 percent of the total population.
- West Virginia Total Annual Medicare Spending equals \$4,221,000,000.

### Documented Shortage of Primary Care Health Professionals

- According to the Health Resources and Services Administration , West Virginia has 123 total primary care Health Professional Shortage Areas (HPSA).
- West Virginia's population living in a primary care HPSA equals 643,000, which represents 35.6 percent of the overall population of West Virginia.
- Fifty of West Virginia's 55 counties are considered medically underserved. There are more than 120 licensed audiologists in the state who could help.

### Hearing Loss Statistics

- Of the more than 36 million Americans who experience hearing loss, 30 percent are 65-74 years old and 47 percent are 75 years old and older.
- West Virginia has 446,000 residents with hearing loss, which represents 24.7 percent of the state population.
- Untreated hearing loss results in a greater occurrence of other physical and mental conditions in elderly patients, substantially reducing the quality of life for older adults and increasing Medicare spending. Treated hearing loss enhances the quality of life and reduces health care costs.

### National Data on Older Adult Falls

- Every 18 seconds, an older adult is treated in an emergency room for a fall. Falls are the leading case of trauma in the United States.
- The average cost for a fall injury is \$30,000 and the direct medical cost for falls is \$50 billion annually.
- Among older adults (those 65 or older), falls are the leading cause of injury death. They are also the most common cause of nonfatal injuries and hospital admissions for trauma.
- Elderly falls are preventable as are their associated financial and societal costs. Audiologists reliably diagnose and treat the vestibular disorders and help prevent older adult falls.
